

Analyzing Site Performance with XHGui and XHProf

Paul Reinheimer

Performance

- ▶ Friday 10:50am
Hampstead

Scaling /
Performance

What every
developer should
know about
Performance

Morgan Tocker

How long a task takes to complete
How many tasks per unit of time
Maximum number of tasks you can complete

Plan

- ▶ Past
- ▶ Present
- ▶ Future

Past

XHProf

- ▶ PHP Extension, records timing and memory details surrounding function calls

Wednesday, March 9, 2011

Facebook released XHProf as a PHP extension a few years ago

We can run XHProf on production unlike X-Debug

XHProf runs on PHP and HipHop

Facebook ran XHProf on all their servers, information is worth the overhead

Configuring XHProf

`; Directory in which the loadable extensions
(modules) reside.`

```
extension_dir="/usr/local/lib/php/extensions/"  
extension="xhprof.so"
```

```
xhprof_enable(XHPROF_FLAGS_CPU +  
XHPROF_FLAGS_MEMORY);  
//Your Codes  
$xhprof_data = xhprof_disable();
```

UI

- ▶ Data is stored is serialized and stored in files
- ▶ Easy to display a single run
- ▶ In combination with Graphviz you can generate nice graphs

Present

Problems with XHProf

► Datastore

Wednesday, March 9, 2011

MySQL, MySQLi, SQLServer

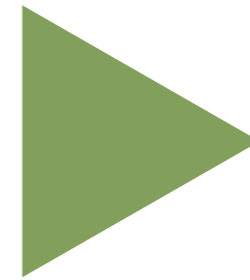

Other backends are trivial, Postgres, SQLite, etc should only be a little time

XHGui Install
